

TUNNEL IN COURSE OF CONSTRUCTION

THE UNDERGROUND PASSAGE WHEN COMPLETED WILL CONNECT THE PATENT OFFICE BUILDING WITH THE FORMER POST OFFICE DEPARTMENT BUILDING.

BENEATH F STREET

Government Buildings to Be Connected With Tunnel.

TO HOLD ELECTRIC WIRES

Will Connect With Conduits From Pension Office.

COMPLETION SET FOR NOV. 1

Slope in Underground Passage Required in Order to Avoid the Sewer Main.

By underground passage—without putting foot to open street—after November 1 one may walk from the Patent Office building right over to the former Post Office Department building. That is to say, it may be done with permission of the superintendent of the buildings—for it is not to be a public walkway.

A brick tunnel, flat at base and arched, its six feet of interior height and four feet of width affording sufficient room for any ordinarily tall man to walk upright—and stooping is not forbidden to stunts—or for any ordinarily thick man to squeeze through—for humans of more than a yard and a third diameter must give up the enterprise and stay out—in the course of construction. It is already half completed.

Will Carry Electric Wires.

The tunnel is intended to carry the conduits for the electric lighting wires from the producing plant under the former Post Office Department building to the Patent Office and Pension Bureau buildings. The conduits will be set in the thirteen-inch walls of the tunnel, five in each of the side walls and six in the arch, sixteen in all. The wires for the Pension Bureau building will be connected with the conduits from that building under the pavement along F street.

There will be no obstruction in the tunnel when it is a finished product. There will be just brick walls underfoot, overhead and on each side. There are to be 60,000 bricks in that tunnel, which is 152 feet 8 inches long from the front of one building to the front of the other.

It will cost \$2,044 to construct, according to the contract. This is one of the expenditures to be posted to the debit side of the appropriation of \$20,000 for the improvement of the sanitary conditions of the three buildings of the Interior Department.

Slope Made Necessary.

The long tunnel is not level all the way. It is approached by steps downward from both buildings. In order to escape the sewer main that runs along the middle of the street a slope is made imperative. There is a dry well to be made at the old Post Office Department building end.

"77"

FOR

GRIP & COLDS

Coryza-Influenza.

The uncertainties of autumn weather have caused an epidemic of Influenza and Coryza, according to the Health Department.

It especially affects persons of advanced age and men and women whose constitutions had previously been weakened.

It is known by lassitude, shiverings, weight in the head, sneezing, watery eyes, obstruction of nostrils, followed by cough, hoarseness and sore throat, pains and soreness of limbs, fever, loss of appetite.

It is not when the body is hot, but when it is cool that it is most susceptible.

Dr. Humphreys' "Seventy-seven" preoccupies the system, prevents and breaks up the Cold. All Druggists, 25c, or mailed.

Humphreys' Homeo. Medicine Co., Cor. W. 12th and Ann Streets, New York.

of the tunnel, where water seepage, if any, may collect and be drawn off by the steam pumps of the plant.

J. S. Hill, chief engineer and assistant superintendent of the buildings of the Interior Department, is supervising the work of construction. A Washington concern, the R. J. Beall Construction Company, R. J. Beall, Jr., manager, has the contract.

PARK VIEW CITIZENS TO DEBATE REFORMS

Proposition for Indeterminate Sentences and Parole Law Under Consideration.

The proposal for an indeterminate sentence and a parole law for the District of Columbia will be considered by the Park View Citizens' Association at a meeting to be held Friday night, November 1, and by that body probably will be referred to the Federation of Citizens' Associations. It is expected that this will mark the beginning of a campaign of education in the interest of important penological reforms recommended for the District.

The principal speaker at the meeting will be W. H. Whitaker, superintendent of the District workhouse, at Occoquan, who in a recent report to the District Commissioners recommended that provision be made for the reform which the association will discuss.

Officials Invited to Attend.

Invitations to attend the meeting will be sent to the Commissioners, George S. Wilson, secretary of the board of charities; E. S. Martin, supervisor of playgrounds, and other District officials. Mr. Martin will speak on the needs of Washington's playgrounds. Supt. Whitaker's recommendation to the Commissioners will be outlined before the citizens' association. It provides that prisoners should not be sentenced to the workhouse for definite periods, but that instead a parole board should be created, the duty of which would be to determine when a prisoner is ready to return to society and become a useful citizen. The plan even contemplates the finding of employment for discharged prisoners.

May Go to Federation.

If the association, of which John G. McGrath is president, adopts a resolution favorable to the plan, the matter, as stated, will be referred to the Federation of Citizens' Associations. This will assure it being given a wide discussion by all the civic bodies of the District. It is considered likely that Mr. Whitaker's recommendation may be embodied in a bill to be introduced in Congress at the coming session.

BAND CONCERT TODAY.

Fort Myer, Va., 15th Cavalry Band, Arthur S. Witcomb, director, 11 a.m.
Guard mount:
March, "Captain Anderson," Brookshire
Inspection, "Serenade Magnolia," British
Troop the line, "The Morton March," Brooks
